

**Description: DevOps Eng.****Location: Washington DC, NJ****Job Summary:**

The DevOps Engineer will be responsible for implementing an architecture for continuous integration and deployment, monitoring, and administering complex technology implementations in a product-centric environment. They will execute Scrum Agile methodology and implement DevOps methodologies at the project level. The successful candidate will have experience with containerization technologies and deploying and configuring DevOps services using infrastructure.

**Responsibilities:**

- Implement architecture for continuous integration and deployment, and monitoring.
- Execute Scrum Agile methodology and implement DevOps methodologies at the project level.
- Administer complex technology implementations in a product-centric environment.
- Debug cluster-based computing architecture.
- Use scripting or basic programming skills to solve problems.
- Install and administer monitoring tools and configuration management tools (e.g., TFS, Puppet, Chef, Ansible, Salt, LVM).
- Deploy and configure DevOps services using infrastructure.
- Work with containerization technologies (e.g., LXC, Docker, Rocket, OpenShift).

**Minimum Requirements:**

- 3 - 5 years of relevant experience.
- Undergraduate degree required.
- Experience with Scrum Agile methodology and implementing DevOps methodologies at project levels.
- Experience with deployments with on-premise or cloud environments.
- Experience deploying and configuring DevOps services using the infrastructure.
- Experience with containerization technologies (e.g., LXC, Docker, Rocket, OpenShift).
- CSP Certifications (e.g., AWS DevOps Engineer, Azure SA, Oracle Cloud Infrastructure).
- Must possess IT-II Non-Critical Sensitive security clearance or Tier 3 (T3) at the time of proposal submission.

The DevOps Engineer will be crucial in developing and implementing systems that allow for continuous integration, deployment, and monitoring. The successful candidate will have experience with containerization technologies and deploying and configuring DevOps services using the infrastructure. They will have strong communication and problem-solving skills and the ability to work in a fast-paced environment.
